Resource name(s) or number (assigned by recorder) N-267

**P1. Other Identifier:** Maintenance Operations Building (DART)

**\*P2. Location:** ☒ Not for Publication ☐ Unrestricted

**\*b. USGS 7.5' Quad** San Francisco North, Calif. **Date:** 1995

**\*c. Address** 20 North Perimeter Road

**\*e. Other Locational Data:**

**\*a. County** Santa Clara

**City** Moffett Field

**Zip** 94035

**\*P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

Building N267 is located on the north side of North Perimeter Road. Built in 1991, N267 is a one-story, steel frame building designed in a utilitarian style. The rectangular-plan building, clad in corrugated metal siding, is capped by a side-facing gable roof. The foundation is concrete. The east façade contains two integral garages with metal doors. The area east of the building is paved with asphalt and two picnic tables stand on the southern edge of the paving. A secondary one-story, front-facing gable garage stands to the north of the building. The complex is enclosed by a chain-link metal fence topped by barbed wire and an asphalt drive leads from the main road to the paved area east of the building. The ruin of a three-story concrete-block building with one-story gabled entries is located west of the complex.

The primary façade faces east. The entry is located at the south side of the primary façade and features a partially-glazed metal door. The building does not contain windows, but three louvered vents puncture the building's south façade. The primary façade terminates in an unadorned roofline. The building's gable roof is clad in asphalt shingles and three vent pipes project from the roof.

The building appears to be in good condition.

Area NASA Ames Research Center

Period of Significance n/a Property Type Utilitarian

Applicable Criteria n/a

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity)

Building N-267 was constructed on the northern border of the NASA Ames Research Center to function as a Maintenance Operations Building and to house the Disaster Area Relief Team (DART) facilities. This facility is utilized for training and exercise drills. Furthermore, the building is typical of large-scale government facilities, who house their maintenance and operations departments in quickly built, utilitarian buildings. Research at the NASA Ames Research Center Main Library did not yield any relevant historical information on this property.

Building N-267 was constructed in 1991 and does not meet the fifty-year old threshold for National Register of Historic Places properties. Furthermore, the building does not qualify under National Register Criteria Consideration G: Properties That Have Achieved Significance Within The Past Fifty Years, since it is of contemporary construction and does not possess exceptional significance under any of the National Register criteria.
